## THE POWER DRIVING YOUR NETWORK

Time Warner Telecom is the leading provider of metro-area broadband optical networks and services to businesses. Our power is driven by more than 17,000 route miles of our own metro and regional fiber that delivers the local last mile of connectivity to our customers.

In September 2003, Network Magazine cited Time Warner Telecom as the best ISP in the United States. [More...](#)

## ABOUT US

### About Us

#### [Our Management Team](#)

#### [Our Networks](#)

#### [TWTC Q&A](#)

#### [TWTC News](#)

#### [Media Kit](#)

#### [Media Contact](#)

Time Warner Telecom, headquartered in Littleton, CO, is a leading provider of local and regional optical networks and broadband services to business customers. We deliver data, voice, and dedicated Internet access to businesses in 22 states and 44 U. S. metropolitan areas. Our powerful networks, robust product suite and superior customer care make us one of the country's premier competitive telecom carriers.

As a joint venture with Time Warner Cable (now a unit of Time Warner Inc.), we began our business in 1993. Since 1997, our business has changed substantially into an exclusive focus on business customers, including carriers and governmental entities, and an expansion from dedicated services into switched services, Internet and data, and geographic areas beyond the Time Warner Cable footprint.

In July 1998, we became a separate entity apart from Time Warner Cable and were reorganized into a limited liability company, Time Warner Telecom LLC ("TWT LLC"). Soon thereafter, we issued \$400 million of 9 3/4% Senior Notes due July 2008. In May 1999, we went public with an IPO and became Time Warner Telecom Inc.

At the end of 2001, Time Warner Telecom offered telecommunications services over its own optical networks in 44 markets - more than doubling its national footprint from February 2000. This expansion included the acquisition of nearly all assets of GST Telecommunications, giving us presence in 15 West Coast markets.

According to Network IT Managers polled by Network Magazine, September 2003, **Time Warner Telecom leads as the best ISP in the United States.**

### Our Networks

The "Power Driving Your Network" begins with more than 17,000 miles of fiber networks, including nearly 11,000 miles of our local metro networks in 22 states and 44 U.S. markets. Our expansive fiber networks connect to over 3,500 buildings and pass thousands more, providing us a unique opportunity to meet the growing demand for new data services and capture increased market share. Our optical networks are fast, powerful, flexible, secure and highly reliable to deliver a comprehensive suite of voice, data, dedicated Internet and integrated communications services to our customers.

### Enterprise Customers

Whether you are a small, medium, or large-size business, Time Warner Telecom has just the right product or solution to meet your communication needs.

We've built our network to support your complete telecommunications requirements. We offer businesses "last mile" broadband connections for data, high-speed Internet access and voice. Our SONET-based networks include 100% fiber optic, fully redundant, self-healing digital rings. Diverse routing is standard on most of our metro services. You experience the highest quality voice, data and video communications transmission possible. Our innovative **National Operations Center (NOC)** monitors all our networks for reliability and performance, 24-hours-a-day, seven-days-a-week.
